PROFESSIONAL SUMMARY

- 1+ years of experience of developing web application projects based on MEAN stack and front-end technologies like Bootstrap 4, CSS
- 1+ years of experience in design, developing and implementation and support of object-oriented programming knowledge
- Sound knowledge of SDLC and Agile Methodology
- Strong knowledge in Object-Oriented Programming using .net using C#, java and PHP and MEAN stack with vast experience in building web application
- Involved in design and development of Restful APIs and services to interact with database
- Strong knowledge of MongoDB as well as SQL server, experienced with mongoose client and write SQL queries, stored procedure and database normalization

TECHNICAL SKILLS

Programming Languages: JAVA, PHP, ASP.NET Core, C#, JavaScript, NodeJS, Express JS, Typescript
Database/DB Tools and Messaging: MySQL, SQL Server, MongoDB, phpMyAdmin, Oracle
Web Technologies: JavaScript, HTML5, CSS3, JSON, XML, Angular, Boot Strap, AJAX, jQuery
Server: Google Firebase, XAMPP
Testing Libraries: Jest
Operating System: Windows, LINUX
IDEs and Tools: Eclipse, Android Studio, NetBeans, MySQL work bench, Microsoft Office Tools, Postman, Microsoft Visual Studio, GitHub, FileZilla, Google Analytics, Google Tag-Manager
Concepts: Regular Expressions (Reg EX), Data Structure
Methodology: Agile, SDLC, Waterfall

WORK EXPERIANCE

Jr Java Developer   (June 2018 – March 2019)
Advantmed India LLP, Ahmedabad, India

- Involved in complete development of Agile Methodology/ SCRUM and tested the application
- Involved in designing the new application from scratch level and java core data structure and database development and JDBC
- Worked in developing code to access a REST web service from front end using HTML5, CSS3, Bootstrap, and convert the response into a JSON object
- Developed User Interactive (UI) of Web pages with the help of HTML5, CSS3, JavaScript, jQuery, Bootstrap
- Implemented MVC architecture using JSP, Spring, and Hibernate and used Spring Framework to initialize managed beans and services
- Designed table structures and coded scripts to create tables and stored procedures, functions and views in MySQL

Technology: JAVA, JDBC, Servlet, JSP, Spring, CSS, Bootstrap, Rest API, JSON data, MySQL, jQuery

Software Engineer Intern   (January 2018 – March 2018)

Advantmed India LLP, Ahmedabad, India

- Participated in the implementation of client side and server-side programming using MySQL, ASP.NET, Bootstrap, HTML5 and CSS3
- Improved knowledge on SQL Join queries and app security by implementing Authentication and Authorization
- Implemented web form Validations by creating RegEx
- Developed Application using Test Driven Development, also written Integration tests

Technology: C#, SQL, ASP.NET Core, Bootstrap, HTML

Software Engineer Intern   (July 2017 – September 2017)

Advantmed India LLP, Ahmedabad, India

- Worked under Senior Team members and got knowledge of Agile Methodologies
- Enhanced the knowledge of the ASP.NET object-oriented programming and relational database concepts
- Utilized the Microsoft visual studio and SQL server management throughout the internship

Technology: C#, SQL, ASP.NET Core, Bootstrap, HTML

PROJECTS

Romato (Online Food Order System)   (May 2020 – August 2020)

- Requirement gathering for capstone project and participated in project planning sessions with team members.
- Implement the complete project based on agile methodology/SCRUM
- Used NoSQL (MongoDB) to store data and mongoose NPM module to interact with MongoDB
- Developed dynamic web content using Angular 9, HTML 5, Typescript, Bootstrap, CSS and jQuery
- Participated in the implementation of client-side and server-side programming using HTML, CSS, Typescript, NodeJS, Express JS, Angular 9, Bootstrap 4 and other NPM modules
- Involved in debugging and unit testing using Jest
- Used GitHub for Version Control

Technologies: NodeJS, Express JS, Angular 9, Typescript, NPM, Bootstrap 4, HTML 5, CSS 3, Jest (Testing)

Weather App (Part of Learning Experience)

- Used basic HTML, CSS, to make UI more appealing
- Get the data from map box API and inject it to weather stack API to get real time weather information of provided location
- Get the help from express, request and HBS module from NPM library to send request and et the data
- Deployed the app on Heroku web hosting site using SSH key
- Weather App: https://yash128-weather-app.herokuapp.com/home

Technologies: NodeJS, HTML, CSS, Weather Stack API, Map Box API

EDUCATION

Web Design and Development (Post-Graduate certificate)   (May 2019 – August 2020)
Conestoga college, Kitchener, ON
GPA – 3.7/4.0, Dean's list 2019

Computer Engineering (Bachelor of Engineering)   (August 2014 – May 2018)
Gujarat Technological University, India
CGPA – 7.82/9, Distinction
